7:00 A.M.

Registration

7:55-8:00 A.M.

President Opening Remarks/Welcome

Dr. Sheldon Nadal, DPM

8:00-8:45 A.M.

Online Marketing: The New Wild, Wild West

Mr. Rem Jackson

Marketing your practice on the internet has become an essential business activity for all medical offices, not just podiatry practices. This has led to the rise of hundreds of “companies” offering SEO services with claims that range from being specially “Google Certified” to guaranteeing a tsunami of new patients (often at hefty prices) with no way for the practice to understand what is even being done. In this session you will learn how to see “online snake oil,” understand what you truly need to know, and protect yourself and your staff from poor online marketing practices.

8:45-9:45 A.M.

Why Do Some Practices Succeed and Soar while others Struggle?

Dr. Peter Wishnie

It seems that some doctors are doing very well even in the complex times in which we live, while others are truly struggling; losing their nights and weekends to burdensome paperwork, while falling further and further behind financially. There is a identifiable reason for this and it isn't clinical abilities. In this session, you will learn how you can turn any challenge or issue you are facing into a problem that is solved and get your serving you and helping you achieve your goals rather than being more and more overwhelmed. There is a simple answer.

9:45-10:00 A.M.

Adding Value to Your Practice Through Leadership

Mr. Rem Jackson & Dr. Peter Wishnie

As a doctor, we help our patients. As a boss, we need to learn to lead our staff in order to make the practice the most efficient it can be. Every organization needs a true leader, and a true leader teaches others to lead. Learning to be the best leader you can be will help you have all the riches you will need from your practice.

10:00-10:30 A.M.

Break/Visit Exhibits

10:30-10:45 A.M.
